Application/Control Number: 10/624,215

Art Unit: 2873

1. The preliminary amendment filed on 7/22/03 has been entered.

Information Disclosure Statement

2. If applicant is aware of any relevant prior art, he/she requested to cite it on form PTO-1449 in accordance with the guidelines set forth in M.P.E.P. 609.

Claims Rejection Under 35 USC - 112

3. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

In claim 4, line 3, "said another termination" has no antecedent basis.

In claim 5, lines 3 and 4, "the end stop projection of the female hinge" has no antecedent basis.

Claims Rejection Under 35 USC - 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Application/Control Number: 10/624,215

Art Unit: 2873

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over **Fortini** (5,781,270).

Fortini discloses frame for spectacle which comprises a hinge device having a female hinge and a male hinge engages by a screw (see figures 2-4 and the related disclosure.) Fortini does not discloses that the female hinge is a U-shape as that claimed by applicant.

Although the Fortini device does not teach the exact shape of the female hinge as that claimed by Applicant, the shape differences are considered obvious design choices and are not patentable unless unobvious or unexpected results are obtained from these changes. Additionally, the Applicant has presented no discussion in the specification which convinces the Examiner that the particular shape of the female hinge is anything more than one of numerous shapes a person of ordinary skill in the art would find obvious for the purpose of providing support. *In re Dailey*, 149 USPQ 47 (CCPA 1976). It appears that these changes produce no functional differences and therefore would have been obvious.

5. Any inquiry concerning this communication should be directed to Examiner Dang at telephone number (571) 272-2326.
